

SPECIFICATION AMENDMENTS

In the Substitute Specification, rewrite the paragraph running from line 5 to line 9 of page 5 as follows:

The three ~~[[discs]]~~ disks 7, 8 and 9 have two holes 10 ~~whit,~~ traverses that traverse them. The member 2 can be seen in the drawing to have a central ~~vertical~~ axis of ~~symmetry~~ and a support upper surface transverse to this axis on which the stone 15, for example, can be supported (FIGS. 4 and 5).
